

OVASTRIM

+ Complete Solution for Ovary Health & Egg Production

OVASTRIM

Complete Solution for Ovary Health & Egg Production

OVASTRIM is a natural herbal preparation with selected trace minerals enzymes & enzyme activator to improve the ovarian function by stimulating the secretion of gonadotropin & also ensures ovarian function through following action.

MODE OF ACTION:

- Organic chromium regulates the activity of hypothalamus-pituitary-ovarian axis by augmenting insulin signaling, which in turn, improves responsiveness of pituitary cells to GnRH and optimises the release of FSH & LH.
- Maintain prolactin level of birds, thereby maintaining the egg production.
- In **OVASTRIM** herbal extract are natural endocrine stimulators for secretion of FSH & LH.
- Rejuvenates the female reproduction system.
- **OVASTRIM** having glucosides, tannins, isoflavonoids, phytosterols can restore the ovarian activity and rejuvenate the shell gland.
- Stimulates ovarian activity

MAJOR INGREDIENTS:

- *Leptadenia reticulata*
- *Pueraria mirifica*
- *Pueraria tuberosa*
- *Asparagus racemosus*
- *Tinospora cordifolia*
- Chromium glycinate

WHY OVASTRIM

- Help initiation of laying in non layers.
- At advanced age of layer and breeds when ovarian function is compromised.
- Helps young adult pullets that are not coming into reproductive system.
- As layer birds get older there is an increase in FCR but with the use of **OVASTRIM** the egg production remains optimum with better FCR even after 78 weeks of laying

Feeding Rate :

Commercial layers : 50g/1000 layer birds, daily for 10 days or more, as required.

Breeder hens : 75gm/1000 birds, daily for 10 days or more, as required.

Presentation : 5 Kg bag

Feed Inclusion Rate : 500g per ton of complete feed.

Water Inclusion Rate : 20-30 ml/100 birds for 7-10 days or more as required.
