

# RESPURE -LQ

To Keep Respiratory Tract Clean & Pathogen Free

*More Essential Oil  
More Effective*

# RESPURE -LQ

## Nature's Way For Optimum Respiratory Health

Respiratory diseases are major causes of mortality and economic losses in commercial poultry production. Both for the control and prevention of respiratory disorders, antibiotics are indiscriminately used with variable success and future consequences. Since ancient time, ethereal oils of herbal origin are well-known for their beneficial effects against respiratory disorders.

**RESPURE-LQ** is a water soluble liquid concentrate based on a combination of ethereal oils of plant origin in suitable base. **RESPURE-LQ** contains 70% ethereal oil with proven efficacy against all respiratory pathogens and disorders. The main active components of **RESPURE-LQ** are 1,8-cineole, pinene, eugenol,  $\beta$ -caryophyllene, carvacrol, menthol and cinnamaldehyde, along with other numerous phyto-synergists.

Eucalyptus oil helps limiting certain inflammatory mediators, thus controls the pathogens in respiratory tract. Menthol as a local anesthetic, antiseptic and cooling agent helps alleviating laryngitis, bronchitis, tracheitis and sinusitis. It also relieves irritation of respiratory tract and soothes respiratory mucosa. Basil oil controls both bacteria and viruses in respiratory tract. Mucolytic action of Tulsi oil helps easy expulsion of mucus secretion and controls airway congestion. Cinnamon oil and Camphor are local antiseptic and deter the growth of all known respiratory pathogens.

### APPLICATION :

5ml of **RESPURE-LQ** in 50 lit of warm drinking water (of 1-2 hr) for 1000 birds, twice daily, for 3-5 days. Dissolve **RESPURE-LQ** in a small quantity of water and mix properly; Mix the solution thoroughly in the rest of the water.

For areal spray, use 50ml **RESPURE-LQ** for 10,000 birds upto3 weeks of age diluted in 5-10 Lit warm water, twice daily, for 3-5 days. For older birds, 100 ml of **RESPURE-LQ** may be sprayed mixed in 10 liters of warm water twice daily. For poultry house of e.g. 10-12 thousand sq ft for chickens up to 3 weeks of age, 50 ml of **RESPURE-LQ** in 10 L of warm water daily is ideally recommended. Keep curtains down by 75% for 1-2 hr after spraying **RESPURE-LQ**. These applications can be repeated at the recommended method until the desired results are obtained.

### Presentation:

250 ml per bottle.
